

Blindfolded Mole

Materials

Chair
Scarf (or material for a blindfold)

Directions

Moles are blind, and use their noses to get around. In this game, one child is the mole and wears a blindfold.

This mole has a poor sense of smell, and can't find the way back to the molehill (represented by a chair in the middle of the room).

Have the mole try to find the chair and sit down without help.

Then you or another partner can help guide the child to sit on the chair.

Then switch positions, and have the other child be the Mole

MAKE SURE THE ROOM IS CLEAR OF OBSTACLES!
